

The CVE Shop Gravity Louvre Shutter can be used for discharge air in domestic and commercial ventilation systems. Suitable for external use.

The louvres provide automatic airstream operation, suitable for use with airstream temperature from -30°C to +60°C. They are lightweight with self-closing gravity flaps, streamlined shape and durability.

Manufactured from high standard ecologically friendly material. UV stabilised.

These Louvre Shutters are supplied with 4 fixing screws and plugs.

The standard finish for this product is light grey.
