

MADE TO ORDER

CVE Top Entry Galvanised Metal Grille Box for use with CVE Shop grilles and diffusers.

Manufactured to order from 0.8mm or 1.0mm galvanised mild steel depending on size. Grille boxes are available with or without a 20mm flange at the open end. Most grilles require this flange; egg crate, single and double deflection for example are generally screwed through the front face into the flange on the box. Diffusers however, do not require this flange as the boxes are commonly fixed to the grille through the side of the grille box.

NOTE: Spigot size must be smaller or equivalent to box size.

MADE TO ORDER

CVE Side Entry Galvanised Metal Grille Box for use with CVE Shop grilles and diffusers.

Manufactured to order from 0.8mm or 1.0mm galvanised mild steel depending on size. Grille boxes are available with or without a 20mm flange at the open end. Most grilles require this flange; egg crate, single and double deflection for example are generally screwed through the front face into the flange on the box. Diffusers however, do not require this flange as the boxes are commonly fixed to the grille through the side of the grille box.

NOTE: Spigot size must be smaller or equivalent to box size.

MADE TO ORDER

CVE Swirl Diffuser Plenum Box with Central Locating Bar for Swirl Fixing Bolt.

Manufactured to order from 0.8mm or 1.0mm galvanised mild steel depending on size. Grille boxes are available with or without a 20mm flange at the open end. Most grilles require this flange.

Swirl diffuser plenums can be supplied lined with acoustic foam.

Outside flange size of these plenums is always 595mm x 59mm. Height varies to suit side entry spigot size required. Side entry is most common for this type of diffuser but top entry is available if required.
