

The Round Jet Diffuser is designed to jet the airflow right down to the floor, which aids in mixing and circulating the air.

It is particularly efficient for rooms with higher ceilings and stairwells where a stronger more direct flow is required to get to the floor level and mix properly.

The Round jet Diffuser is constructed from ABS, powder coated white (RAL 9010).

Other finishes are available to suit the interior and architectural design requirements.

Features

- Flush mounting
- Easy clean non reflective white surface
- 2 sizes, 150mm & 200mm
- Fully adjustable flow from complete shut off to fully open
